BIO: THE CLEAR CHOICE FOR BI THAT WORKS THE WAY YOU DO

Your business is unique. Your IT environment is unique. Your users are unique. Why lock yourself into a business intelligence solution that doesn't work the way you do?

BIO BUSINESS INTELLIGENCE PROVIDES GAME-CHANGING OPTIONS OUT-OF-THE-BOX FOR JUST ABOUT EVERY ASPECT OF YOUR BI IMPLEMENTATION.
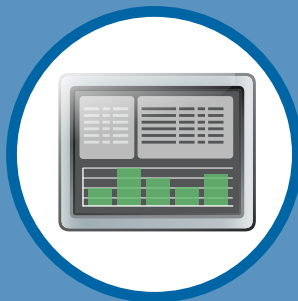

You choose—**IN-MEMORY OR MULTIDIMENSIONAL MODELING.** BIO is the only leading BI solution for Microsoft Dynamics that offers both.

You choose—**VISUALIZATION OPTIONS** for reporting, ad hoc analysis, and dashboards. Don't get locked into an Excel-style viewer—BIO has BIOVue, an advanced visualization tool, right out of the box, and can work with any of hundreds of viewers on the market.

You choose—where BIO resides. BIO can be hosted **ON-PREMISE OR IN THE CLOUD** to work with your existing infrastructure.

You choose—where you use your BI solution. BIO offers **MOBILE OPTIONS** that allow you to access your data from wherever you need to. And because BIO is web-based, you can easily distribute reports and analyses to just about anyone, just about anywhere.

MORE—load your data into a data warehouse or not, use a single data source or as many data sources as you need, use BIO's out-of-the-box cubes or create your own, use out-of-the-box content like preprogrammed reports and predefined formulas, hierarchies, and folders, or customized your own.

Because all of these options are built into BIO, it is simple to tailor your BI solution to your business. We've done the work so you don't have to. Now you can have a BI solution the way you want it without the complexity and cost of developing it yourself.
